

## VOORDELEN

- Zeer schoon media
- Lage drukval
- Verschillende media types kunnen worden gecombineerd in hetzelfde filter

|                                  |                                                                         |
|----------------------------------|-------------------------------------------------------------------------|
| <b>Toepassing</b>                | Cleanroom recirculatie lucht, cleanroom compensatielucht (make-up air). |
| <b>Kader</b>                     | Roestvrij staal;Gegalvaniseerd staal                                    |
| <b>Pakking</b>                   | Polyurethaan;EPDM                                                       |
| <b>Sealant</b>                   | Polyurethaan                                                            |
| <b>Maximale temperatuur (°C)</b> | 40                                                                      |
| <b>Vochtigheid (RH)</b>          | 30% - 70%                                                               |
| <b>Zuiverheid deeltje</b>        | ISO Klasse 6                                                            |
| <b>Commentaar</b>                | Uitgassen: Individuele getest op VOC-emissies                           |

| Omschrijving | Type verontreiniging   | Afmetingen BxHxD (mm) | Debiet/Weerstand (m³/h/Pa) | Gewicht (kg) |
